👍 Account Security

- Use strong passwords

- Avoid using the same password for multiple accounts

- Activate multi-factor authentication and login notification

- Use separate/dedicated email accounts for registration

- Pay attention to suspicious login attempt alerts and take appropriate action if necessary, such as changing password

♥ Privacy Protection

- Understand the privacy policies of the platforms and properly configure the security and privacy settings

- Do not post or disclose excessive personal information

🔍 Other Security Tips

- Install anti-malware software, and keep the software and definition file updated

- Always be cautious when clicking on links or files from both trusted and untrusted sources

- Perform fact-checking as far as possible

- Do not disseminate or share message that contains malicious contents or links

- Be vigilant when networking with strangers

- Refrain from acts or activities which may breach the laws including doxxing

- When being threatened or in case of crimes, consult trusted people such as relevant experts or report to police if appropriate
