

BEWARE OF PHISHING EMAILS

How to identify phishing emails?

Generic greeting or salutation

Suspicious senders or unofficial domain names

Grammatical / spelling mistakes

Asking for sensitive personal information

Intimidating messages or messages requesting urgent processing

Offers sound too good to be true

What should you do if you receive suspicious emails?

Do not disclose sensitive personal information to suspicious senders

Verify the identity of sender through channels other than those stated in the email

Do not click suspicious links or open suspicious attachments

Delete the confirmed phishing email message

Report to appropriate parties as necessary, e.g. the impersonated party, IT support of your organisation or the Hong Kong Police Force
